

AireSpring Dedicated Internet Access

PRODUCT OVERVIEW

Many businesses underestimate the amount of bandwidth they need to operate while continuing to expand. Almost all the hot new business technologies demand increasingly larger bandwidth to deliver maximum benefits. Additionally, the emergence of web based systems, video streaming, conferencing, large data uploads/downloads and the prevalence of multi location companies and business satellites needing to stay in synch, drive the need for exponentially growing bandwidth. Until now, data solutions have been relatively pricy with choice-limiting one-size-must-fit-all offerings. The AireSpring Dedicated Internet Access and High Speed IP data products make it possible to meet your demands with the exact bandwidth you need today and the flexibility to support your expansion tomorrow.

KEY FEATURES/BENEFITS

- Full range of Internet products up to Gig E
 - Dedicated Internet Access (DIA)
 - Fast Ethernet
 - Gigabit Ethernet
 - 10 Gigabit Ethernet
 - 2 Mbps to 1000 Mbps
 - DS1 – 1.5 Mbps, Bonded 3.0 to 12 Mbps
 - DS3 (Full Port and Fractional)
 - OC3
 - OC12
 - Ethernet Over Copper available in expanded coverage areas.
 - Available with optional managed router
- Top carriers at lowest rates
- Broadest nationwide coverage over 6 tier one networks

FLEXIBILITY

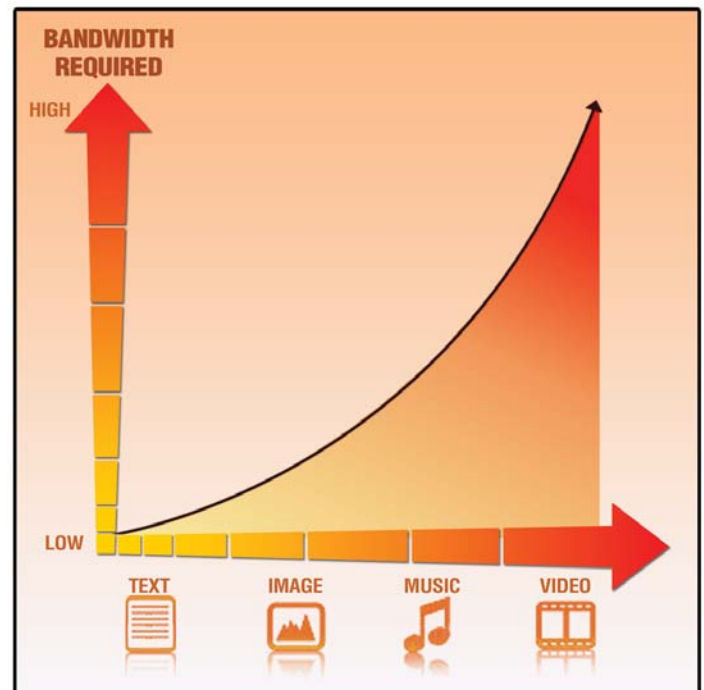

BUSINESS = BANDWIDTH. Without enough Bandwidth, your business can't function. There are three pitfalls businesses can fall into.

- **Underestimate** the amount of bandwidth needed to operate.
- **Ignore the signs** - Slow speed that come about from insufficient bandwidth. This is not the cost of doing business; it is a needless loss of productivity.
- **Accept "one size fits all" solutions** that result in paying for bandwidth you don't use, chronically running low when traffic is high or not being able to easily scale bandwidth to expansion realities without expensive upgrades.

The AireSpring High Speed IP products are specifically designed to fit every customer's unique situation – you get exactly what you need. AireSpring is an acknowledged leader in the High Speed IP and SIP Trunking fields and are continually evolving to embrace the latest technology while at the same time passing down the savings to our customers.

Value points:

- Multiple carriers and diverse network routes for maximum security
- Extremely competitive rates
- Fast turn up
- Most complete range of bandwidth options for every business situation
- Single point of contact
- One bill even if multi-location installation
- Customer support is expert at helping to determine exact bandwidth needs based on existing equipment and usage
- Core access to tier-1 internet backbone, bandwidth guaranteed
- Options for burstable data consumption. Pay for only what you need
- Provides reliable and constant data throughput for both up and down stream data traffic
- Connect your multi location company data routes seamlessly

*As your file sizes increase, you'll need more bandwidth.
 Don't get caught with your packets down!*
