# PEACE OF MIND

Today, more than ever, business owners need to protect their intellectual property and company assets against electronic theft, fraud, viruses and both natural and man-made disasters. With Cbeyond's suite of security services, you can keep your important company information safe and secure.

### ▶ Secure Desktop

Keep your Windows PCs free from viruses, spyware, and other Internet threats so you can focus on your business. Updates are automatic so you spend less time managing applications.

### ▶ Cloud Servers

Host your server off-site to ensure your data is secure in the event of a man-made or natural disaster. Cbeyond Cloud Servers are located in physically secure data centers with restricted access and redundant power supplies.

### ▶ Virtual Private Network

Secure interoffice data network communications are no longer restricted to the boundaries of your office walls. Share data and access your network remotely.

### ▶ Managed Firewall

Shield critical network resources and block unnecessary Internet traffic.

### ▶ Secure Backup

Backup important files quickly and automatically to secure your business information in the event of an unexpected computer crash or hardware failure. Files are stored offsite so they are protected from fire, flood or theft.

### ▶ Wireless Backup

When your business has real time operations that are dependent upon your data network, Wireless Backup ensures your data services remain active when disaster hits. With Cbeyond's Wireless Backup, your data\* services will automatically failover to a 3G wireless connection in the unlikely event that your service is interrupted.
