

Company Overview

MASERGY provides the telecommunication network that connects office locations for large businesses. The company specializes in delivering network services to large national and international enterprises. We simplify networking for these companies in a number of ways:

- **Delivering Consistent Services**—get the same award-winning services anywhere on the planet you do business, all from a single company
- **Offering Software Prioritization**—pick the applications that are most important to your business, and the network automatically enforces those decisions
- **Providing Real-Time Control**—control your network services and make service changes immediately using our patented, web-based Service Control Center
- **Converging Network Services**—combine your voice, video and data services on a single, seamless network without compromising quality or functionality
- **Automating Network Management**—get granular network information at the click of a button using industry-leading network management software that embeds the costs of software, hardware, integration and management into the service
- **Providing Scalable Solutions**—add new business locations at any time without expensive and time-consuming “network integration” projects
- **Future-Proofing Your Network**—choose new capabilities as they are available because they are built into the network and accessible from your existing service
- **Lowering Network Costs**—reduce your total cost of ownership by avoiding excess network capacity and unnecessary circuits, while improving business performance.

***THERE IS NO OTHER NETWORK IN THE WORLD
THAT CAN DO ALL OF THIS!***

Customer Overview

MASERGY has won a number of industry awards for its innovative services. More important than the accolades, however, are the award-winning services our customers get everyday. Forward-thinking enterprises have implemented these advanced network services and are already experiencing the benefits. These businesses include world-class companies such as:

- | | | |

| - Dunkin Donuts | - Genesis Microchip | - Standard Bank of London |
| - E*Trade | - Hallmark Channel | - The Weather Channel |
| - Edward’s Life Sciences | - Holland & Knight | - Unisys |
| - ESPN | - Lattice Semiconductor | - WR Grace |
| - FedEx | - Pilot Air | - Yellow Book |

Technology Overview

MASERGY has the most mature, proven native IP MPLS network in the industry. Our network is built to deliver the highest quality network experience for converged business application performance (voice, video and data) with the greatest reach, flexibility and scalability in the telecommunications industry.

Currently serving customers in 40 countries spanning six continents, we can deliver our services to any location you do business. The key to MASERGY's global reach is that we do not "hand-off" your network traffic to other carriers. Instead, we utilize the network facilities of other carriers while maintaining total control over the delivery of software running across those "local access" circuits. We also take responsibility for those local connections, so you deal only with MASERGY. One service provider, one point of contact, one simple bill.

Why do we do this? So that we can simplify your business network. This total management approach allows us to deliver our entire, award-winning suite of network services to every one of your offices while also guaranteeing the performance of that traffic across these circuits. Guaranteed performance, predictable results. All on your entire wide-area network.

We don't stop there. We give you patented software that lets you view your network performance and dynamically change your services. You don't need to call us if you want to add a service, request a quote or even change your bandwidth amount at your sites. You can make these changes yourself, in real-time, and even get immediate confirmation that the changes were made. We even offer advanced network management tools that let you get granular network management and reporting capabilities at the click of a button. Of course, our customer support center is there with a technical team available 24x7x365 to help you with these and other service requests.

Industry Recognition

MASERGY's services have been recognized as innovative and best-in-class by the industry's top observers. Recent awards include:

- Winner—Most Visionary Data Service (2005)—Network Magazine
- Finalist—Best New Service (2004)—Light Reading
- Winner—Innovation Award (2004)—TMC Labs

"MASERGY has built a reputation for being reliable and economical...
the Goliaths of the international services sector need to sit up and take note...."
- *Light Reading, Dec. 2004*
