

# Private Link

## Customer-Controlled Intelligent Networks

*Security and Savings from  
a Proven Layer 2 Technology*

### Customer Controlled Networking

**Private Link:** Looking for a simple Layer 2 point-to-point connection with all of the QoS advantages of MPLS? MASERGY's Private Link is exactly what you want. Private Link helps you improve application performance by prioritizing business applications in a scalable, easy-to-manage network environment. Since Private Link is part of MASERGY's Intelligent Transport service, you can combine this product with any other transport option (including Public IP), add a voice and video service within minutes, and integrate the service with your existing network to create a seamless migration path away from Frame Relay and other legacy technology. The service is delivered through Ethernet handoffs to simplify integration with your local area network. Best of all, you can control your network using MASERGY's award-winning Service Control Center to make dozens of changes anytime, day or night, through a web-based service portal.

**Network Security:** MASERGY's Private Link is an MPLS-based Layer 2 service that provides the same level of security as ATM and Frame Relay. You can use it for private addressing, and implement both firewall and NAT capabilities for any public link from the network's edge.

### Features of Private Link include:

- Point-to-point Layer 2 Service
- Up to five levels of prioritization
- End-to-end QoS on an MPLS backbone
- Optional Frame Relay DLCI interface
- Industry leading SLA's

### Benefits of Private Link include:

- Transparent migration from frame relay
- Consistent performance for business applications
- Support for normal data, priority data, critical data, voice, and video
- Significant cost savings versus frame relay

### Voice and Video, Service Level Agreement (SLA's) include:

- 100% packet delivery
- Guaranteed in-sequence packet delivery
- 5ms maximum latency variation ("jitter")
- Sub 1 second fast failover - network recovery
