

DSL is high-performance broadband with reliability your business can count on.

DSL services provide download speeds up to 15 Mbps over a nationwide, multi-redundant private network that optimizes performance and security. DSL is an ideal broadband solution for small and medium-sized businesses that download large files or use the Internet extensively, as well as branch offices and remote workers. We offer a variety of DSL service options to meet the unique needs of your business.

Lineshare ADSL

Allows information to flow asymmetrically up to 6 Mbps/768 Kbps for quicker email delivery and file downloading.

Dedicated ADSL

Gives you the speed, reliability, and throughput of ADSL without phone service from a local phone company (dedicated line).

SDSL

A dedicated line service that offers a symmetrical data transfer rate, typically up to 1.5 Mbps with guaranteed 99.9% uptime and 24-hour Mean Time To Repair (MTTR).

Included with these services are valuable features, like static IP addresses for hosting your own web site or E-mail server. These services can also be used to create a virtual private network (VPN) and come with uptime guarantees as high as 99.9%. Each service is professionally installed by a skilled technician.

Benefits

- Speed you need
- High-performance network
- Service level agreement guarantee
- Uptime Guarantees
- Static IP Addresses
- 24 / 7 / 365 Support

DSL Optimized for Business

Features Chart

	ADSL	ADSL/ADSL2	SDSL
Speed Down/Up in Mbps	1.5/.128	1.5/.384	.208/.208
