

OnePac Line Bundle

Your company might not be as big as the “big guys”, but it doesn’t mean you want to give your customers the impression that you’re small.

Get it all — local, long distance, and Internet Access — in one package with the features and functions you need to increase the productivity of your office.

Voice and Data Together

TelePacific’s OnePac delivers both voice and data over a high capacity T-1. This dynamically allocated service uses your idle phone channels to boost the capacity of your data access when your phones are not in use. Your bandwidth automatically adjusts based on the number of voice channels utilized at any given moment.

With the OnePac Line Bundle, you get...

- ▶ Feature rich business lines that offer the functionality of a PBX without having to make the up-front investment in equipment and maintenance.
- ▶ Internet access over our fully-meshed IP network with Service Level Agreements offering up to 99.999% uptime.
- ▶ Aggressive minute bundles suitable for your traffic patterns.
- ▶ 13 voice and data features to enhance your internal and external communications and efficiency of your business.

Dynamic T1

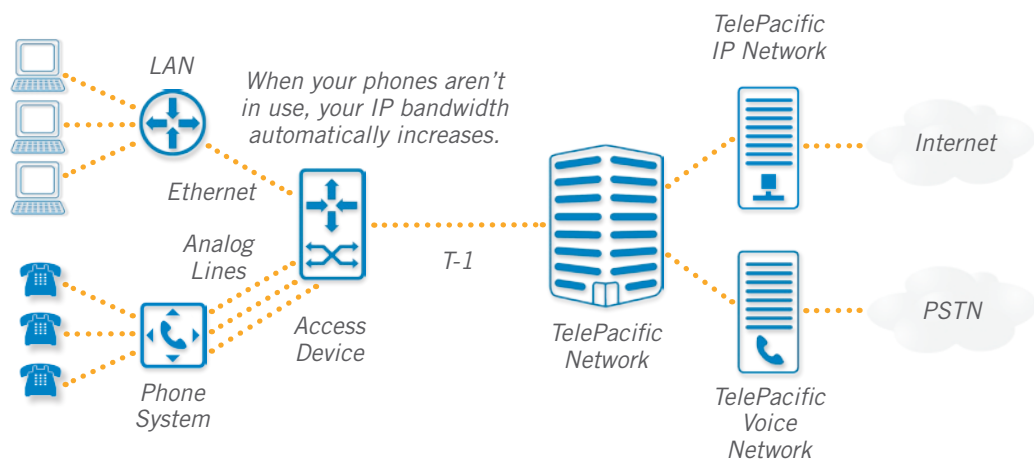

We make sure you have enough voice lines for your calling patterns. And when a line isn't in use, you'll benefit from increased bandwidth.

Get more from your dedicated Internet access when your business uses TelePacific for its voice and data needs.

As always, with TelePacific you get:

- ▶ 24-Hour Technical Support
- ▶ Toll Fraud Monitoring
- ▶ Voice and Data Service Level Agreements

OnePac Architecture

Flexibility in your voice lines

- [] Choose up to 18 feature-rich business lines to suit the needs of your company

Confidence in your data service

- [] Your Internet connection is only a click away with TelePacific's Dedicated Internet Access (DIA). You can trust that your connection will be there when you need it.

Included in Your Package

TelePacific Connect	Scheduling and managing conference calls is now easier than ever. Ask us how to use our free Conference Call bridge. Participants can join in for the price of making normal calls.
3 & 6-Way Calling	Sequentially call up to five additional parties to have a six-way conference call.
Speed Call 8 & 30	Lets you connect with your most frequently called numbers by pressing just a few digits.
Call Transfer	Allows you to transfer a call to another line. Usage charges may apply.
Call Park	Call Park lets you hold a call on one station and pick up the call at another station to avoid running from desk to desk.
Call Forward Variable	Sends calls where you like, inside or outside your company. Just program your telephone with the forwarding number. It's automatic from there. Calls are forwarded regardless of the idle or busy status of the activating station.

Remote Access to Call Forwarding	Allows you to control the designation of your forwarded calls from outside the office.
Call Waiting and Cancel Call Waiting	Allows you to take a second call even if you are already on the line. On important calls, you can temporarily cancel the Call Waiting feature before making the call.

Station-to-Station Dialing	Allows your employees to dial each other in two to six digits. If you are calling from a single location or to multiple locations, on our network, there are no additional charges. These calls to your employees are free.
Call Pickup Groups	Uses your telephone to answer any ringing phone in your designated group. No more running from desk to desk or room to room.
IP Addresses	OnePac provides 8 IP addresses. Of course, TelePacific offers up to 256 IP addresses based on utilization at no additional charge.
Email Hosting	OnePac provides email hosting beginning with 32 email boxes. Need more? They are available a la carte.
Domain Name	OnePac provides domain name transfer, hosting and registration for one domain name at no additional charge.
